HAPPY KIDS

Based in the beautiful hills and forests of Slovakia

our company is dedicated to designing and producing wooden climbing frames, movement toys, and furniture for children with heart and passion. We believe active play is essential for childhood development, fostering creativity and exploration.

Founded in 2017 as a family business, we began with a balance board tested with our own child, drawing on our past and rich experience in designing and manufacturing wooden products. As our children grew, so did our product range, with new toys and furniture added to meet their changing needs. Today, we continue to create high-quality, safe, and sustainable products that parents can trust.

A close-up photograph of a hand reaching over a large pile of wooden mushroom-shaped toys. The toys are light-colored wood with smooth, rounded caps and short stems. The hand is positioned in the upper right, with fingers slightly curled. The background is filled with many more of these toys, creating a sense of abundance. The lighting is warm and soft, highlighting the natural texture of the wood and the skin of the hand.

Sustainability and environmental responsibility

are core values at our company. We work exclusively with materials and parts sourced from local suppliers within the European Union, especially from neighboring countries. By prioritizing local resources, we not only support our regional economy but also significantly reduce our carbon footprint.

We're committed to using sustainably sourced wood in every product we make. Each piece is thoughtfully crafted, celebrating the natural beauty that surrounds us. Our mission is to create joyful play experiences that are in harmony with nature while enriching children's lives.

Our production process is carefully monitored at every stage – from the selection of wood to the final dispatch of packages. We take pride in using zero plastic in our packaging, with the sole exception of necessary polypropylene (PP) straps to secure the boxes. This choice reflects our dedication to reducing plastic waste and minimizing our environmental impact.

Lubo Majer

First thinking, then making!

The manufacturing of children's toys and furniture should never be a random process. These products aren't just for play — they must, above all, be safe and functional.

We take care of every detail to ensure there are no sharp edges or hazardous features. Our products are designed to be safe for your children, while also being functional, aesthetically pleasing, durable, and built to serve your family for many years.

CUBE

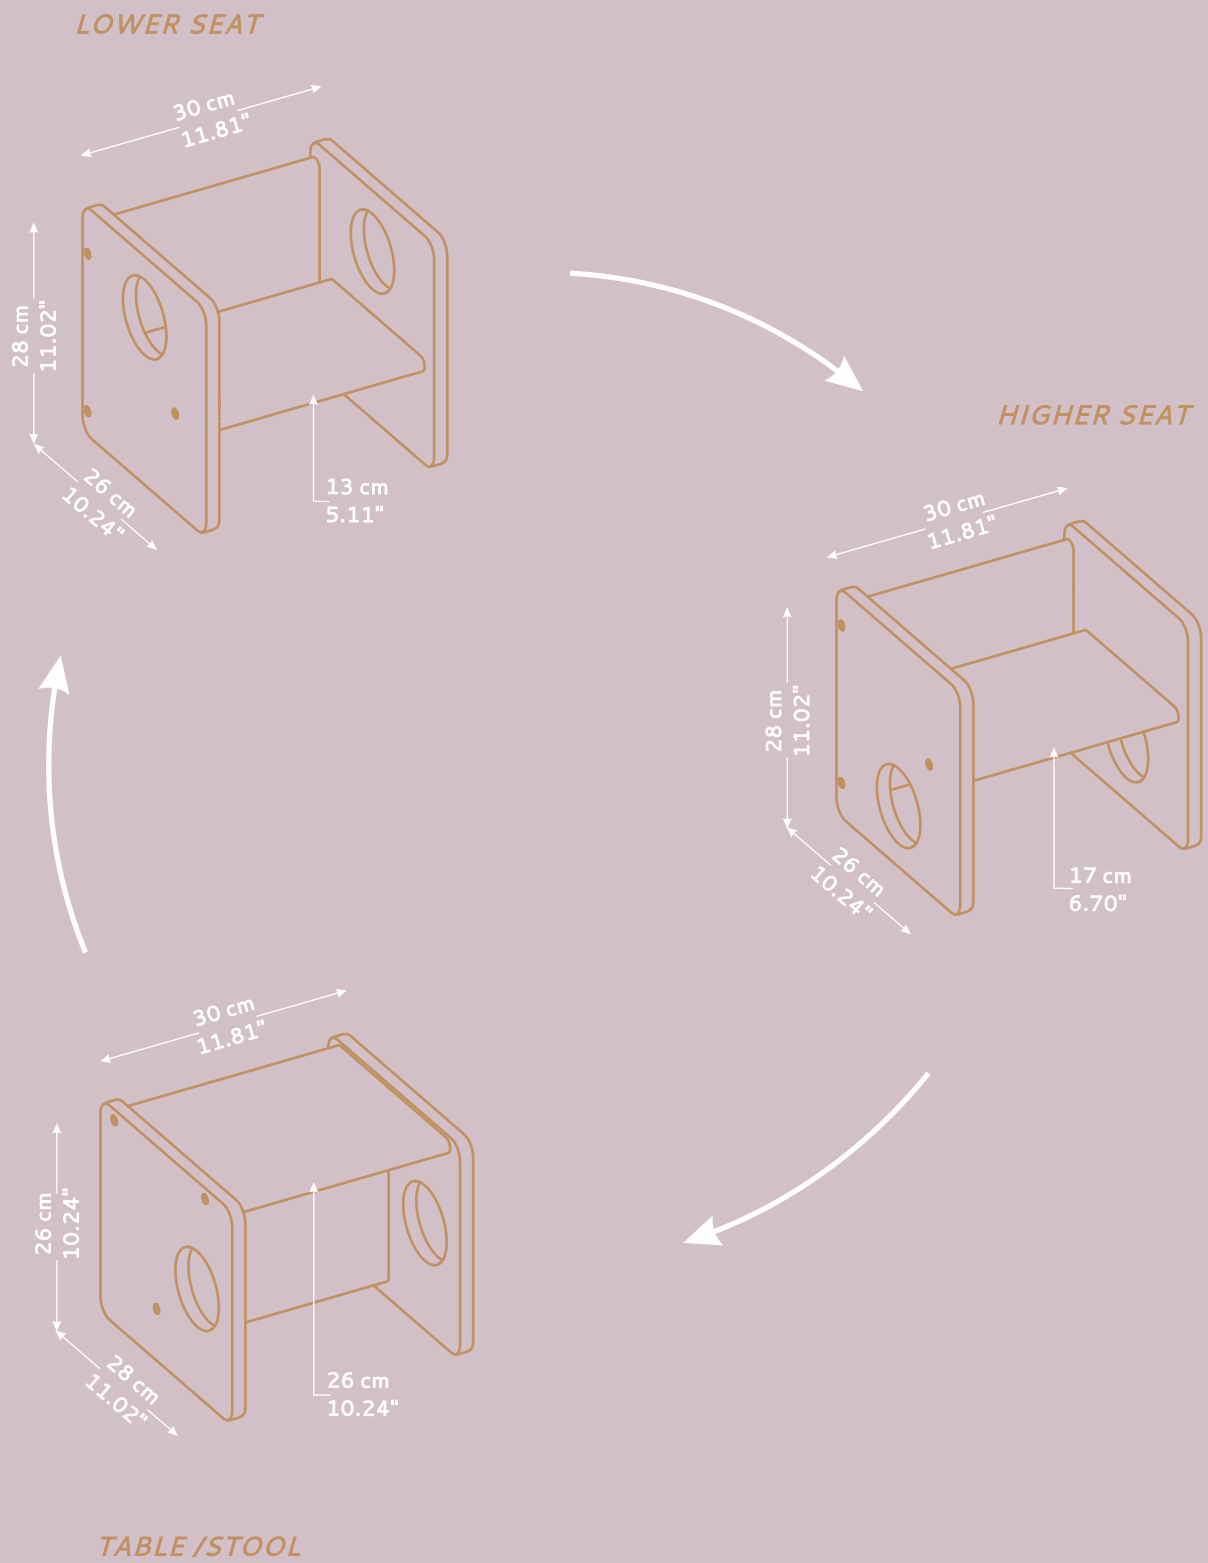

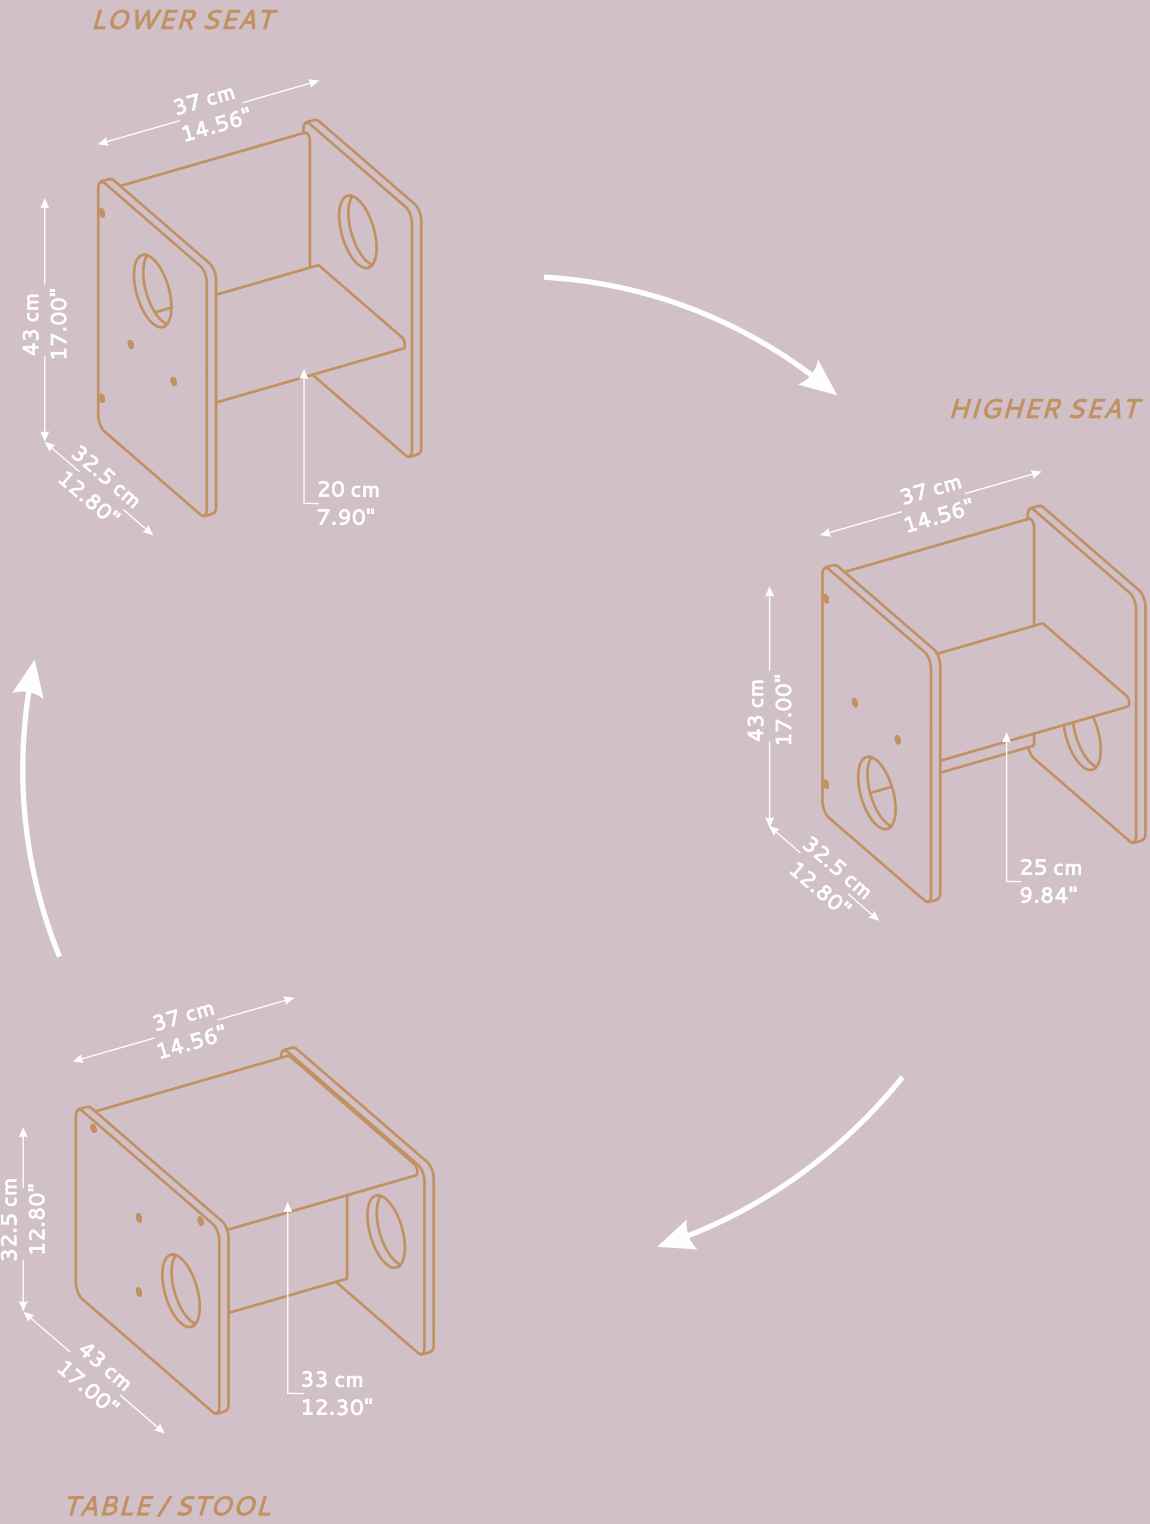

As a child grows, these versatile furniture pieces grow with them. The playful design features round slots for easy handling and offer two seat heights that can be adjusted by flipping the Cube.

The smallest chair is perfect for infants, providing safety and stability while allowing independent movement. The medium-sized Cube transforms into a desk-and-chair set, and the largest Cube that functions mainly as a table, doubles as a spacious bench for creative play.

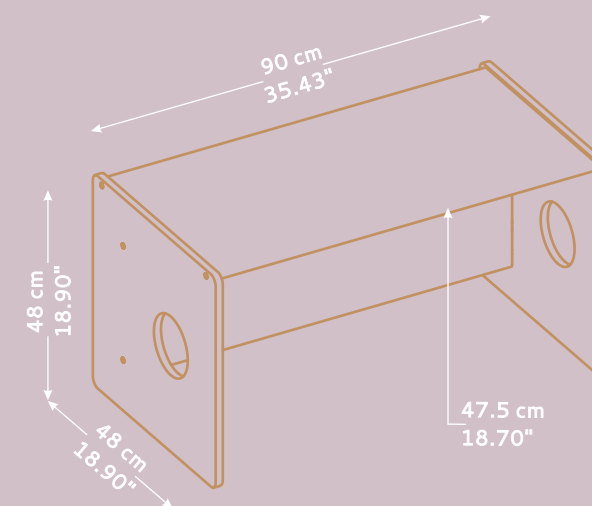

Once your child outgrows the set, the Cubes can be repurposed as a bedside table, storage or stool. Made from solid beechwood and high-quality fittings, these eco-friendly, durable pieces suit any home.

MONTESHELVES

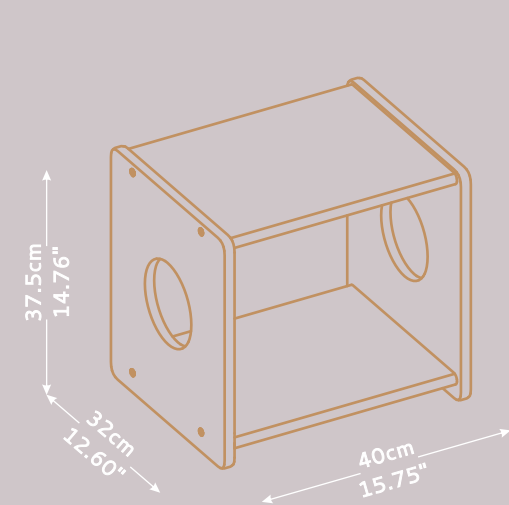

Monteshelves collection consists of 4 Monte shelves in different sizes. The adjustable shelves offer great flexibility, allowing you to customize the storage space as needed, making it perfect for growing children and changing needs.

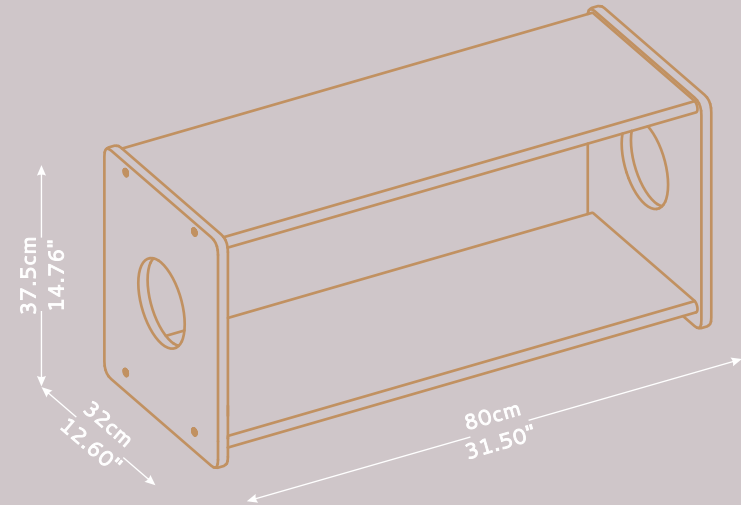

The shelves can be easily combined to create a larger storage system, offering endless possibilities to personalize your space as your needs grow. This versatility ensures a practical and adaptable solution for your home.

Why do we use only solid wood, not plywood?

Solid wood is an ideal material for making children's toys because it is natural, durable, and safe. Its sturdiness and longevity allow toys to withstand rough play and be passed down to future generations.

Unlike plywood, which is made from thin layers of wood glued together, solid wood contains no synthetic adhesives that might emit harmful chemicals. This makes it a safer choice for children.

Additionally, plywood production is significantly more energy-intensive—consuming about 3 times more energy per cubic meter than solid beech wood. Choosing solid wood helps us reduce the environmental impact of our products.

CUBIE

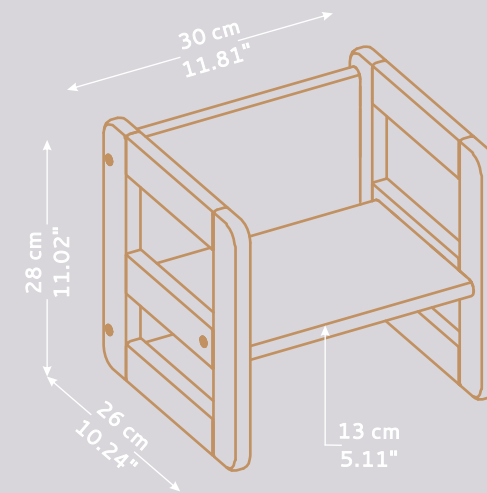

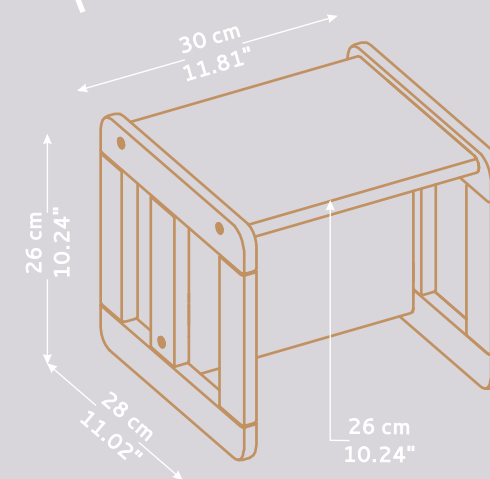

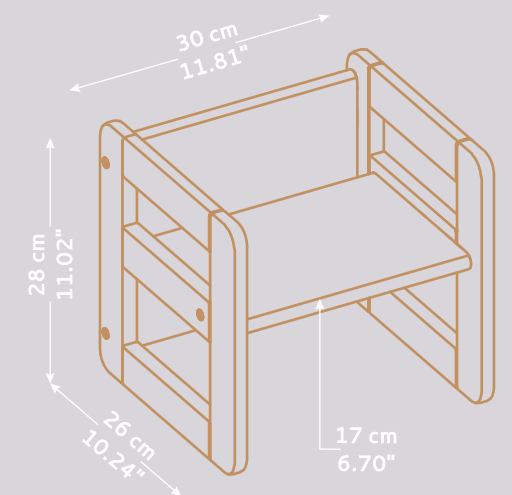

FRAME COLLECTION

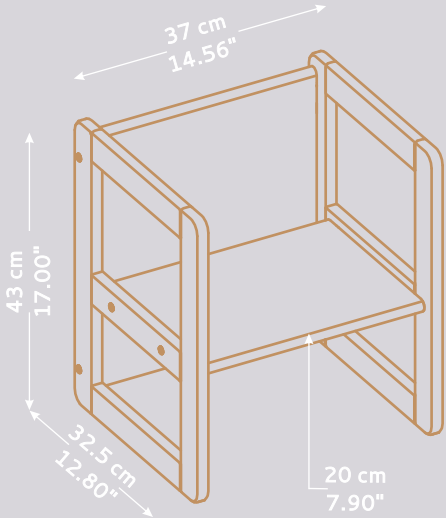

The Cubie, like the classic version, is crafted from solid beech wood, staying true to Montessori principles of durability and simplicity. We've minimized material usage, creating a lighter, more airy design that aligns with a child-friendly, open environment.

The multifunctionality remains intact, allowing each Cubie piece to easily transform. By flipping the chair, you can change the seating height, and the pieces also function as tables, stools, and benches, supporting a flexible, hands-on learning space that grows with your child's needs.

HOUSIE

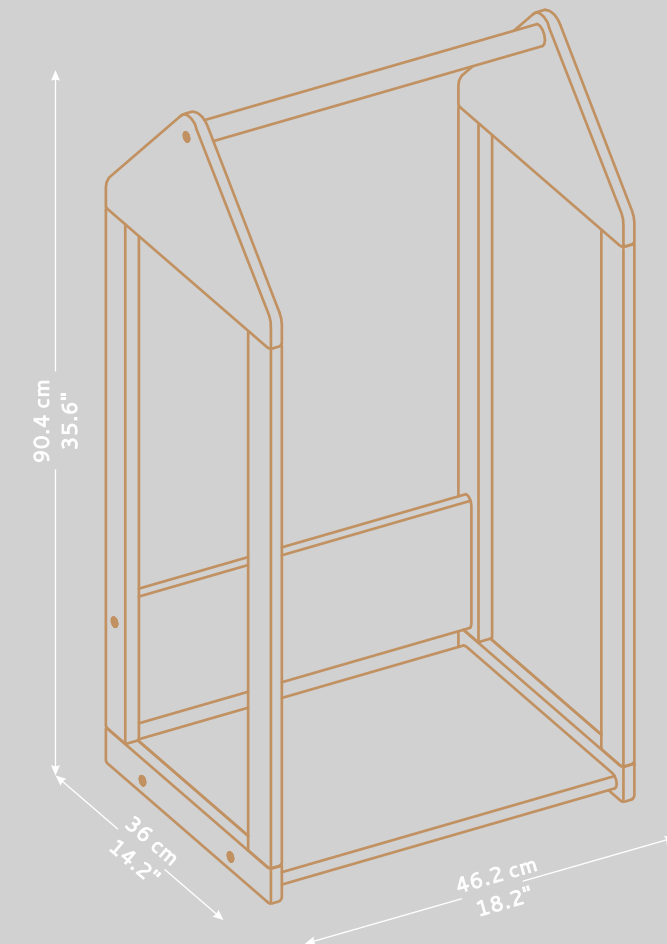

FRAME COLLECTION

The matching collection of shelves and coat rack is crafted using the same frame construction principle as the Cubie. This creates a harmonious series that perfectly complements the Cube, bringing a cohesive and stylish look to the children's room.

The coat rack from this collection features a roof-shaped top, providing ample height and space for hanging clothing of various sizes. The lower storage area offers practical space for items like shoes, hats, caps, or other belongings, adding both functionality and style to the design.

BRUBISHELVES

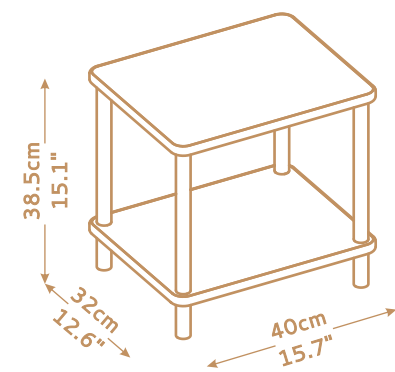

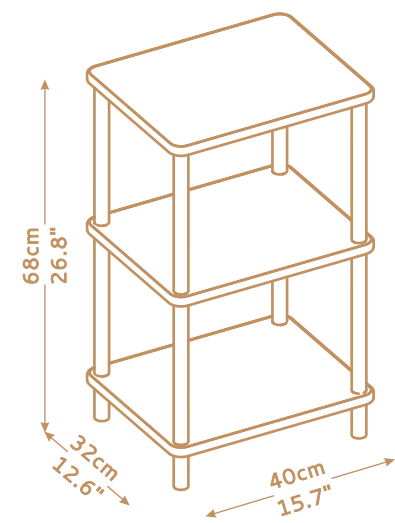

The Brubi shelf is available in a variety of sizes to suit different spaces and needs. The best feature of this shelf is its easy assembly, allowing for simple setup without any complicated steps.

The minimalist design also makes it highly efficient for shipping, as it can be packed into compact, space-saving boxes. Essentially, it's a straightforward shelving system made of solid beechwood, offering both simplicity in construction and durability in design.

BOOKCASES

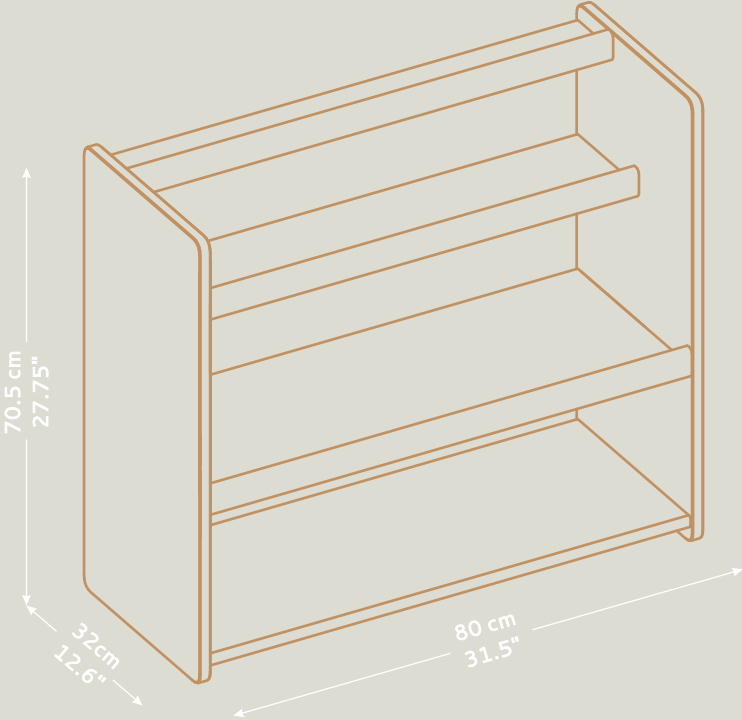

Our collection of 3 bookcases is made from solid beechwood and follows the Montessori principle of creating accessible, child-friendly spaces for books and learning materials. This approach encourages independence by allowing children to organize and access their books easily.

Each type offers unique benefits, catering to various spaces, needs, and developmental stages, providing a functional and inspiring storage solution for every child. The clear, minimalist design ensures the bookcases seamlessly fit into any room while promoting a tidy, organized environment.

The Extra-large bookcase is the largest in the collection. The first three sections allow books to be displayed clearly and visibly from the front, so children can easily select and return them. The lower section can be used for stacking books vertically or for storing other items.

The rounded edges at the corners provide a sense of safety and comfort, making it easier and safer for children to organize and retrieve books on their own.

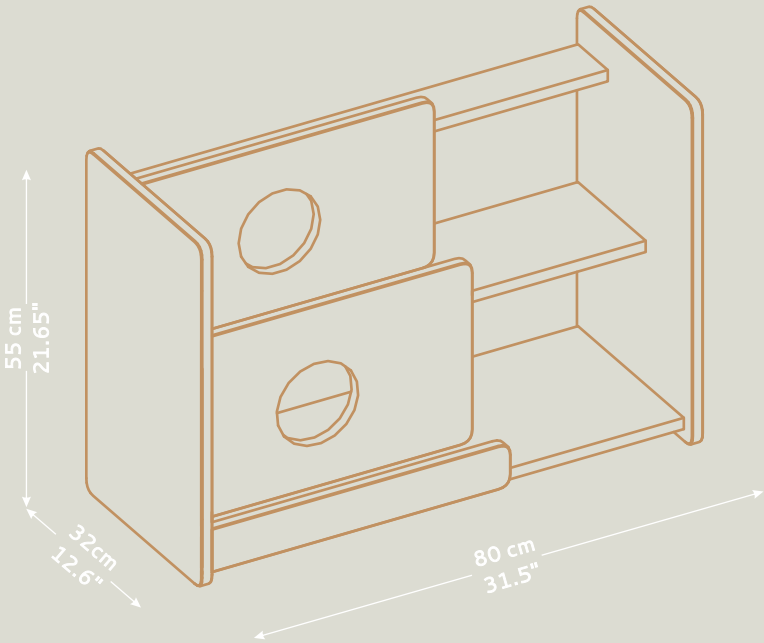

The Large-bookcase features our signature cut-out circles, also found in other Brubi products. It is divided into two sections: one for storing books with clear front covers for easy access, and the other as a classic shelf for toys, games, and more.

An interesting feature of this bookcase is the additional hidden storage space at the back. It provides room for keeping toys, art supplies, or other small items neatly tucked away, helping to maintain a clean and organized space for children.

LARGE BOOKCASE

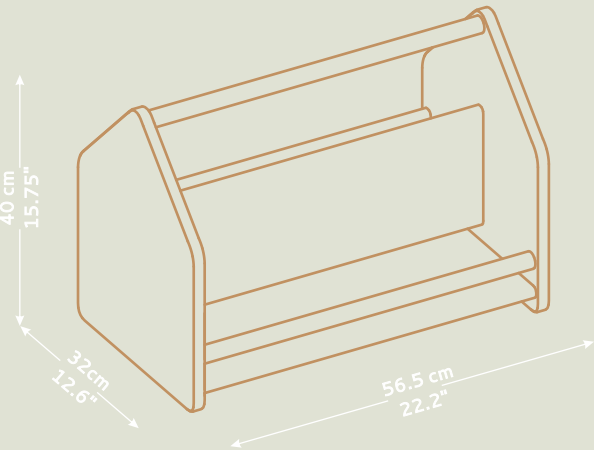

The House bookcase is the smallest piece in our collection, yet it is incredibly practical. It keeps the current book the child is reading always visible and easily accessible, providing an instant reminder with just a glance.

As a movable piece of furniture, it can easily be relocated to any place, such as with parents in the living room, ensuring the child always has access to their favourite books.

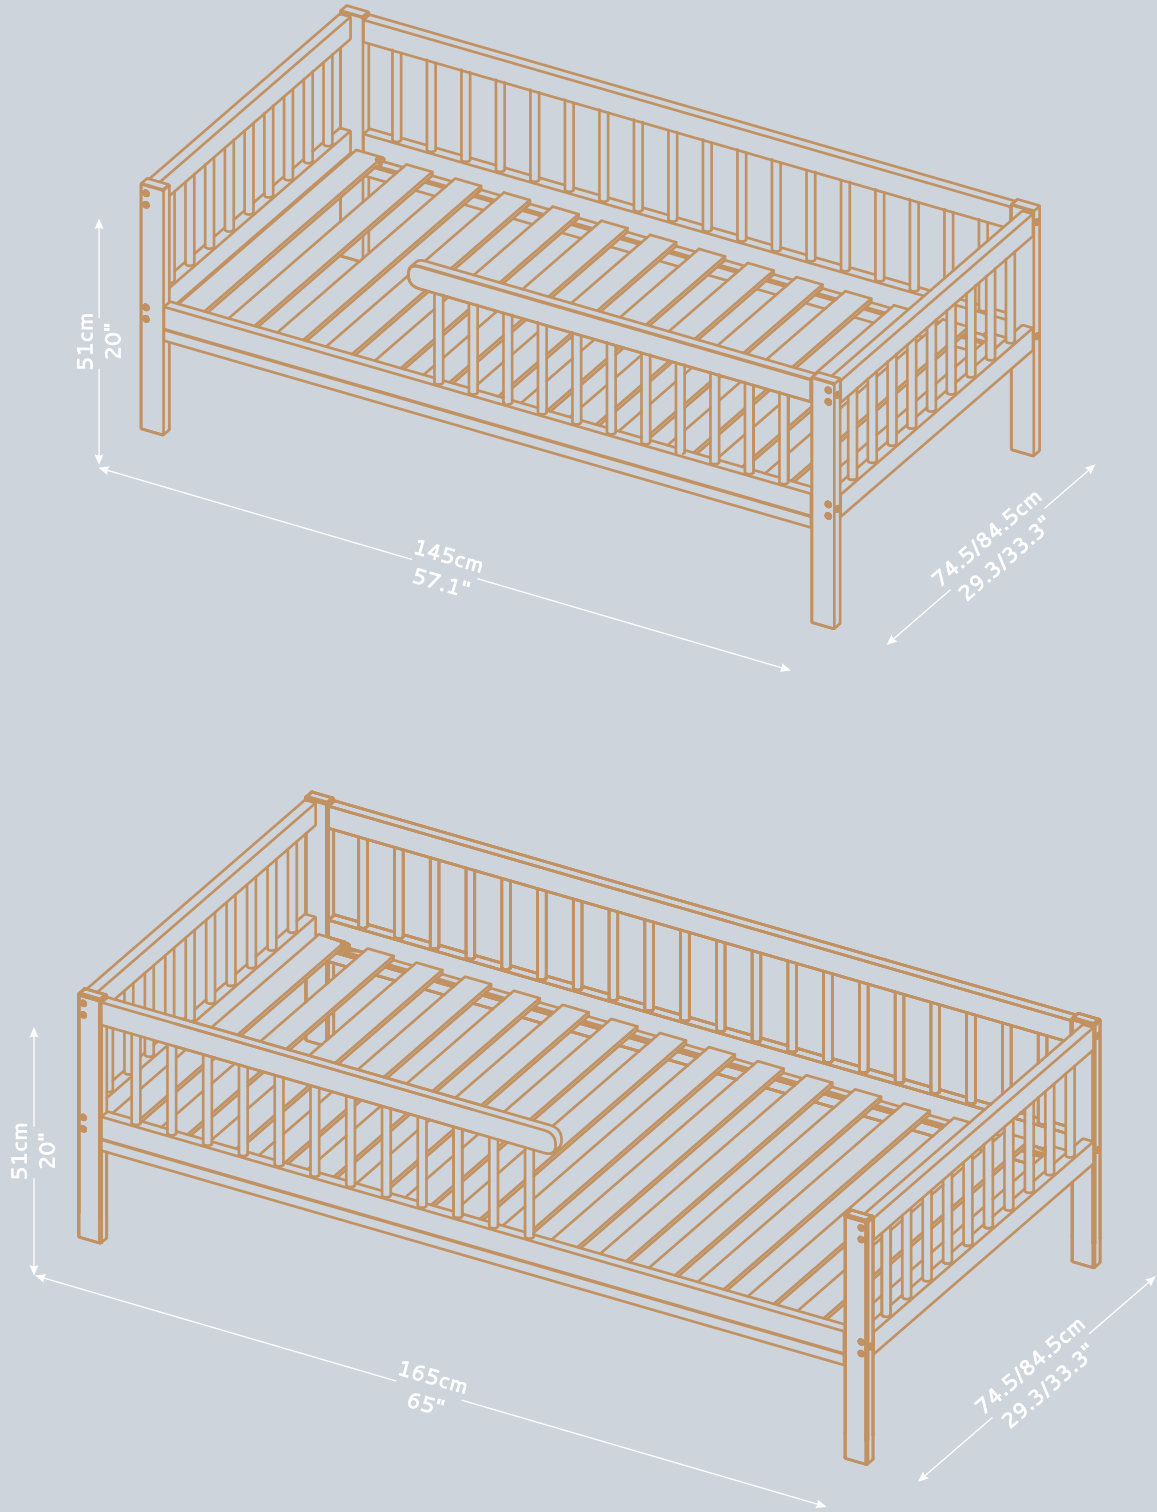

MONTEBED

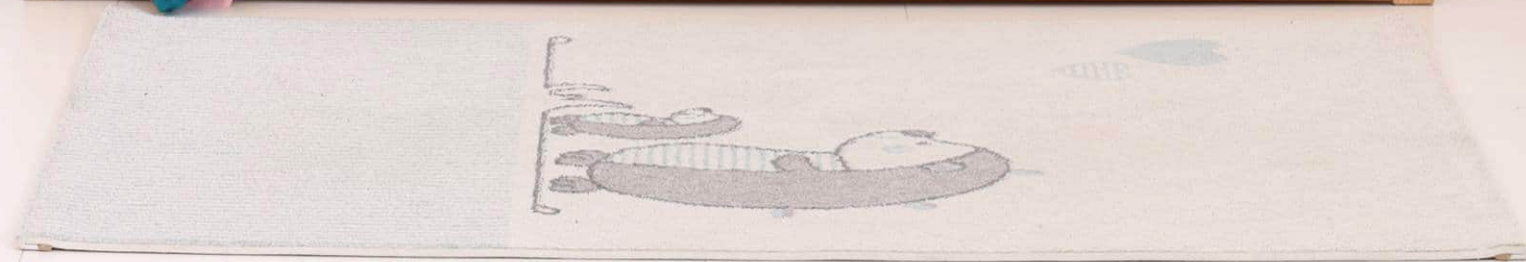

The Montebed with rails and slatted bed base is the perfect option for children transitioning from a crib to a larger bed. Elevated on legs, it offers extra space underneath for storage. The side rails provide safety and stability while allowing the child to move freely and get in and out of bed independently.

The slatted bed base ensures proper ventilation of the mattress, contributing to healthy sleep and comfort. Its simple design fits seamlessly into any children's room, creating a cozy and inviting atmosphere.

FLOORBED

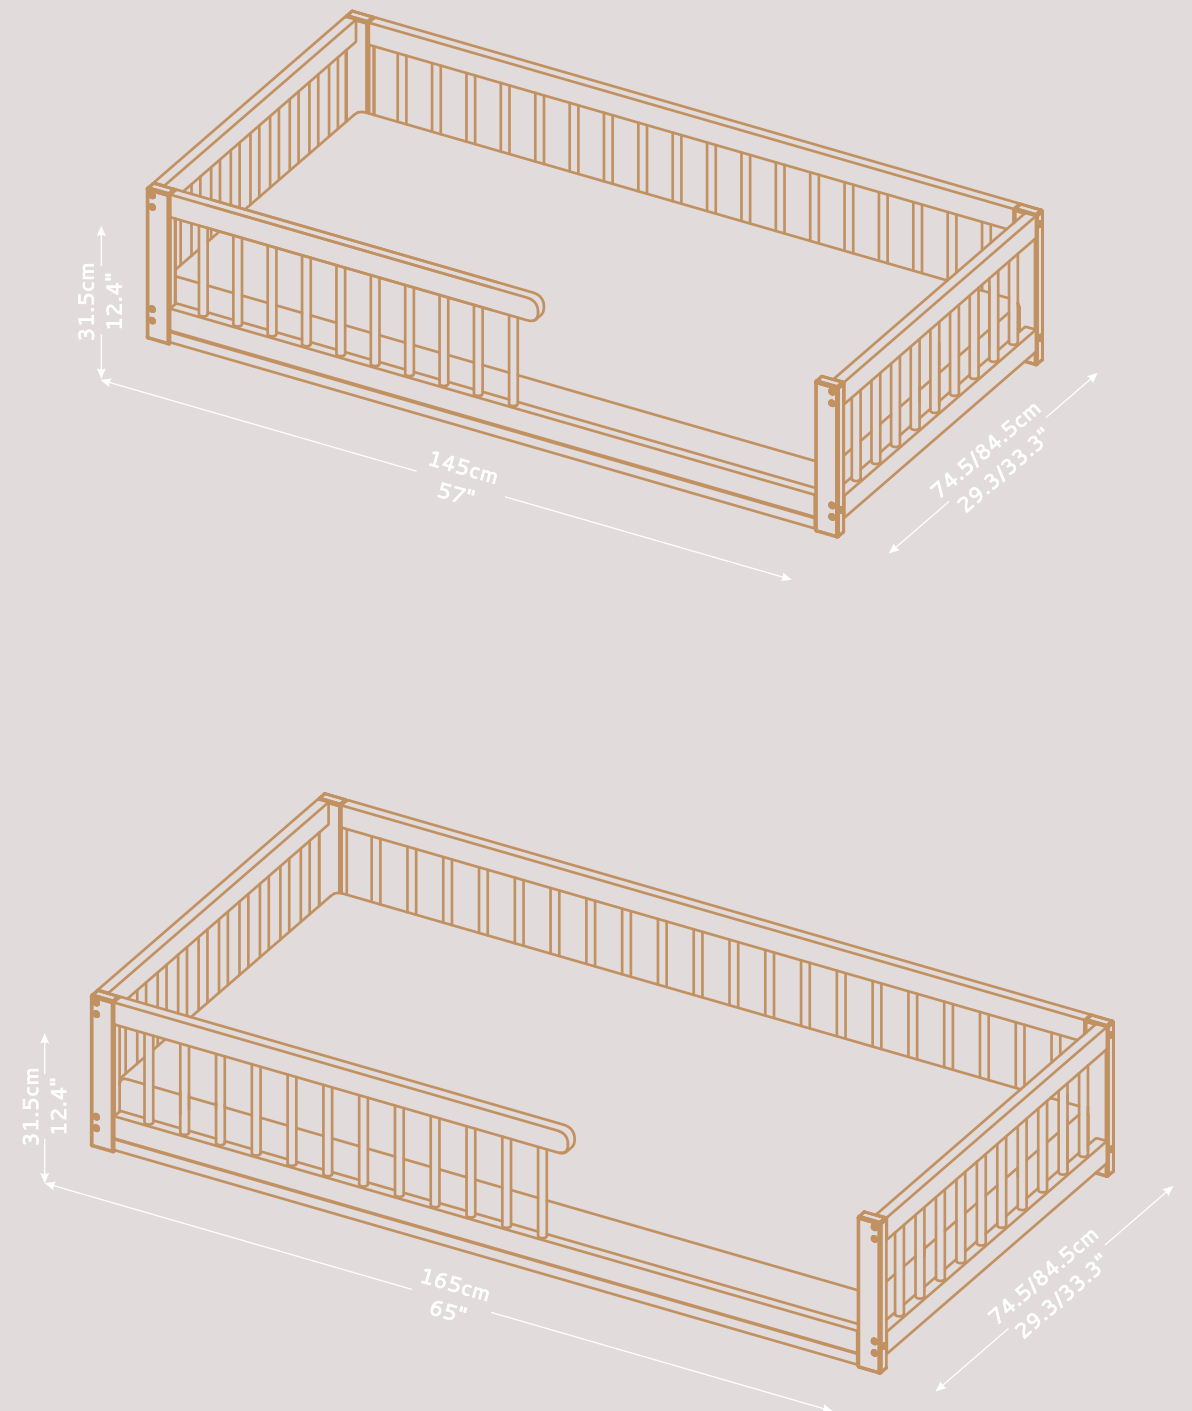

FLOORBED

The floor bed offers the same safety and comfort as the elevated version, but with a closer connection to the floor, reflecting Montessori principles by promoting independence and a sense of security. The absence of legs makes it ideal for younger children or those who may feel more secure with a lower bed.

The side rails provide a protective barrier, allowing the child to climb in and out independently, while the slatted bed base ensures proper mattress ventilation for healthier sleep. Its design blends seamlessly into any children's room, fostering both independence and a sense of safety.

CLIMBING BED

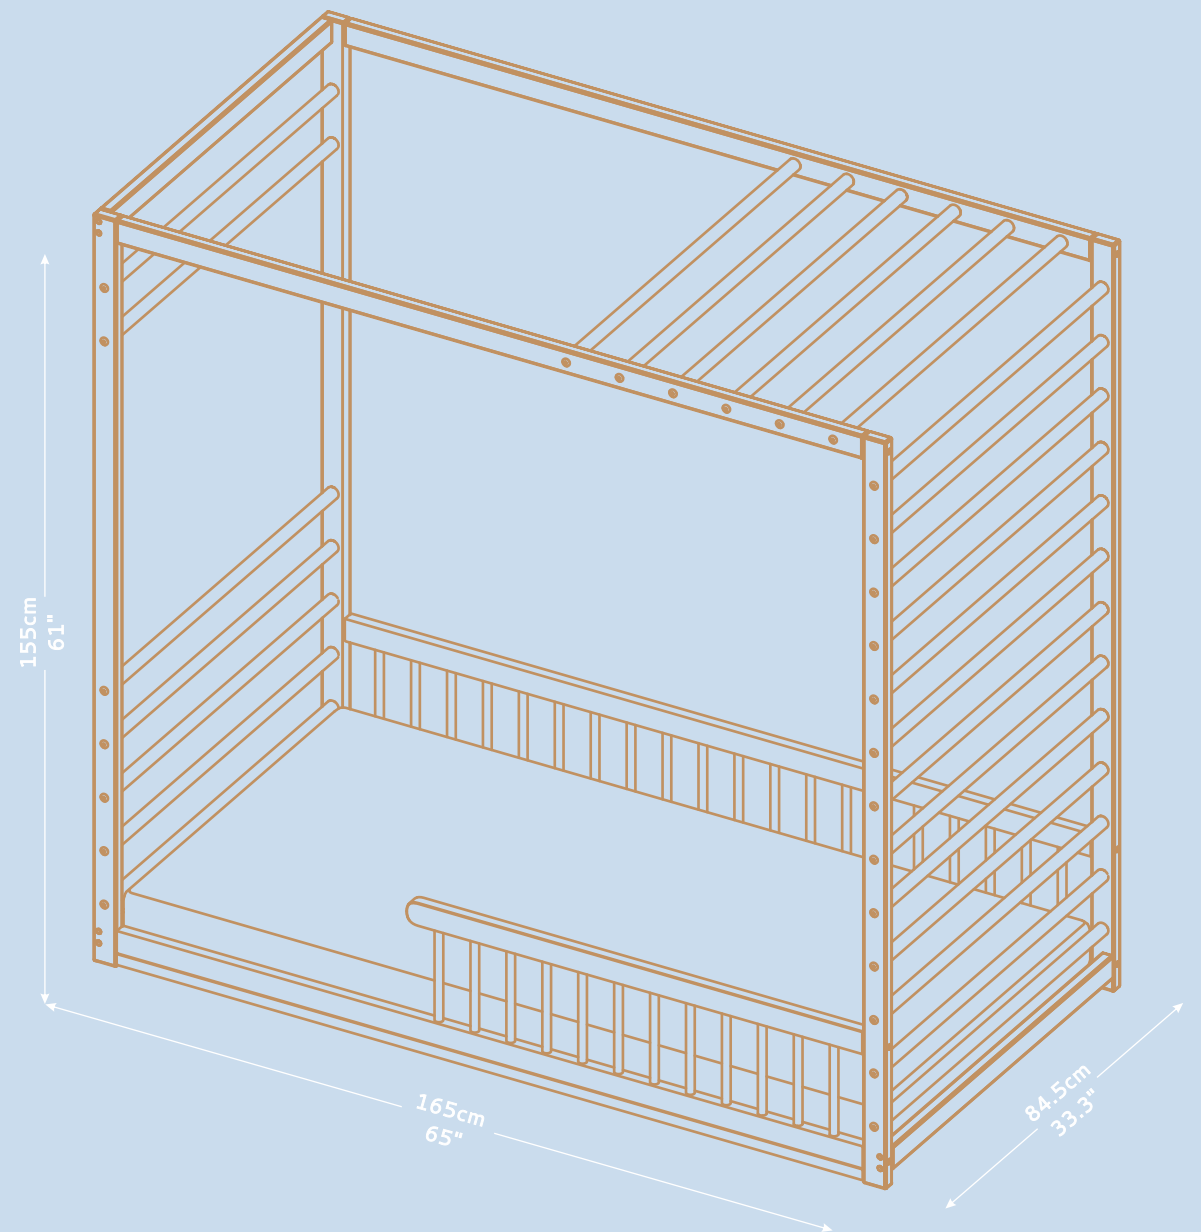

CLIMBING BED

The Climbing Bed is a fun and functional piece of furniture that doubles as both a bed and an indoor playground. Designed with Montessori principles in mind, it encourages children to engage in physical activity and develop their motor skills while promoting independence and creativity.

The bed's sturdy, child-friendly frame features climbing elements. Its multi-purpose design supports a healthy balance of rest and play, making it a perfect addition to any child's room. It creates an environment where kids can play freely, build confidence, and learn through movement—all while enjoying a restful night's sleep.

CLIMBING BED

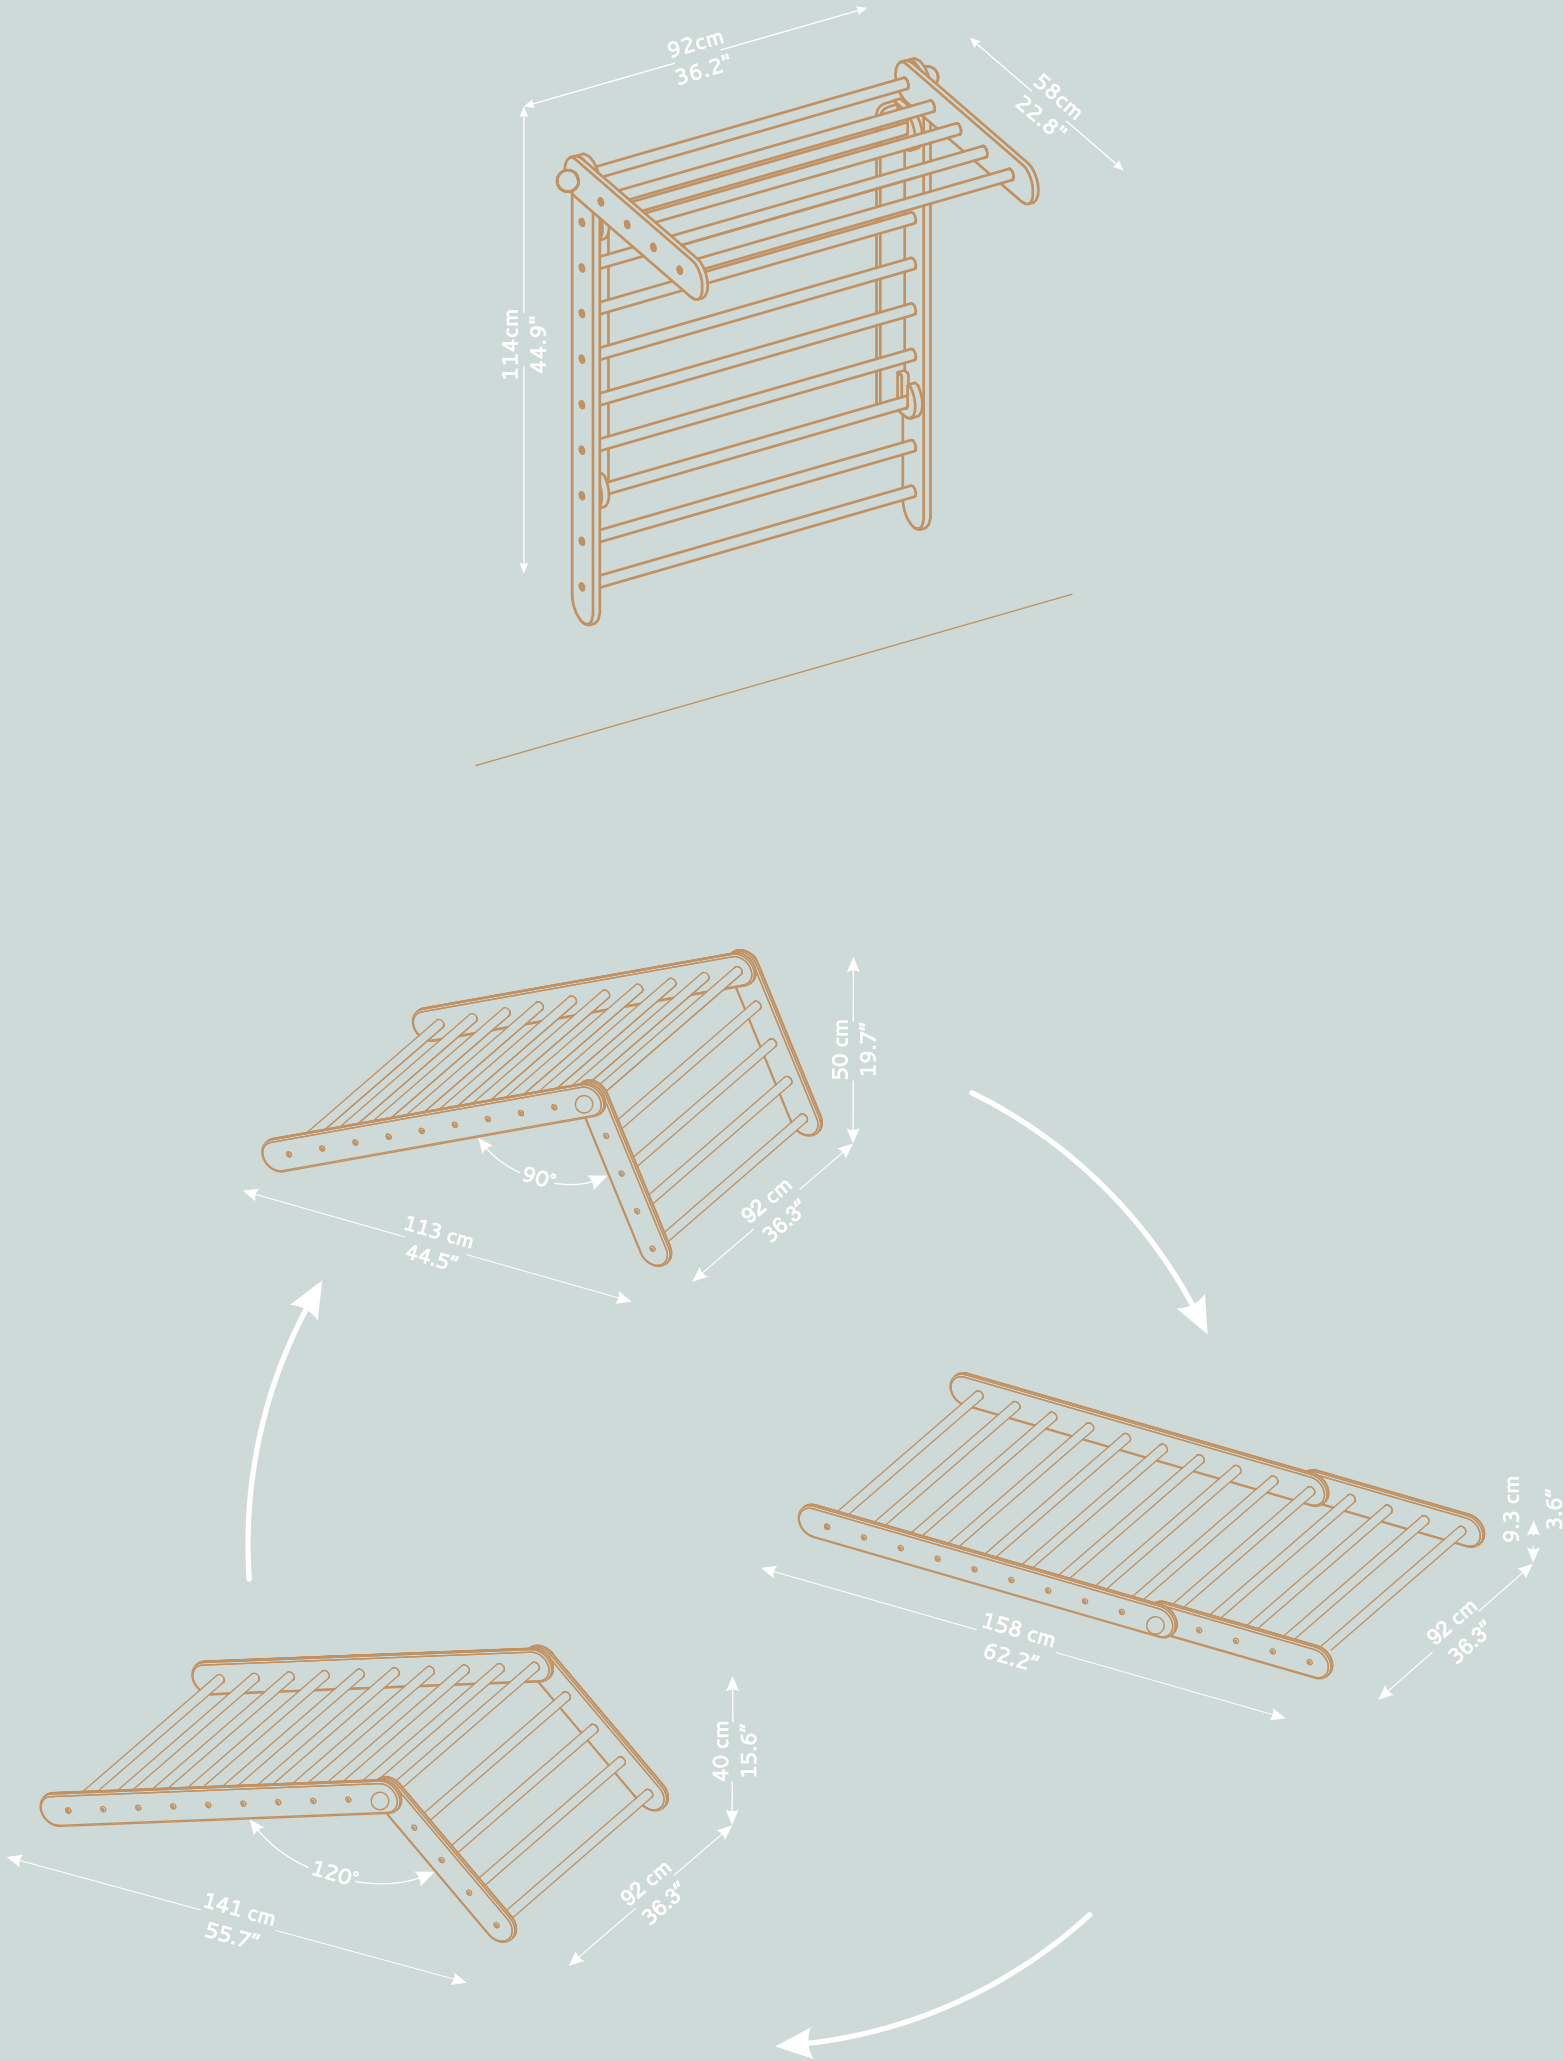

WALLIE

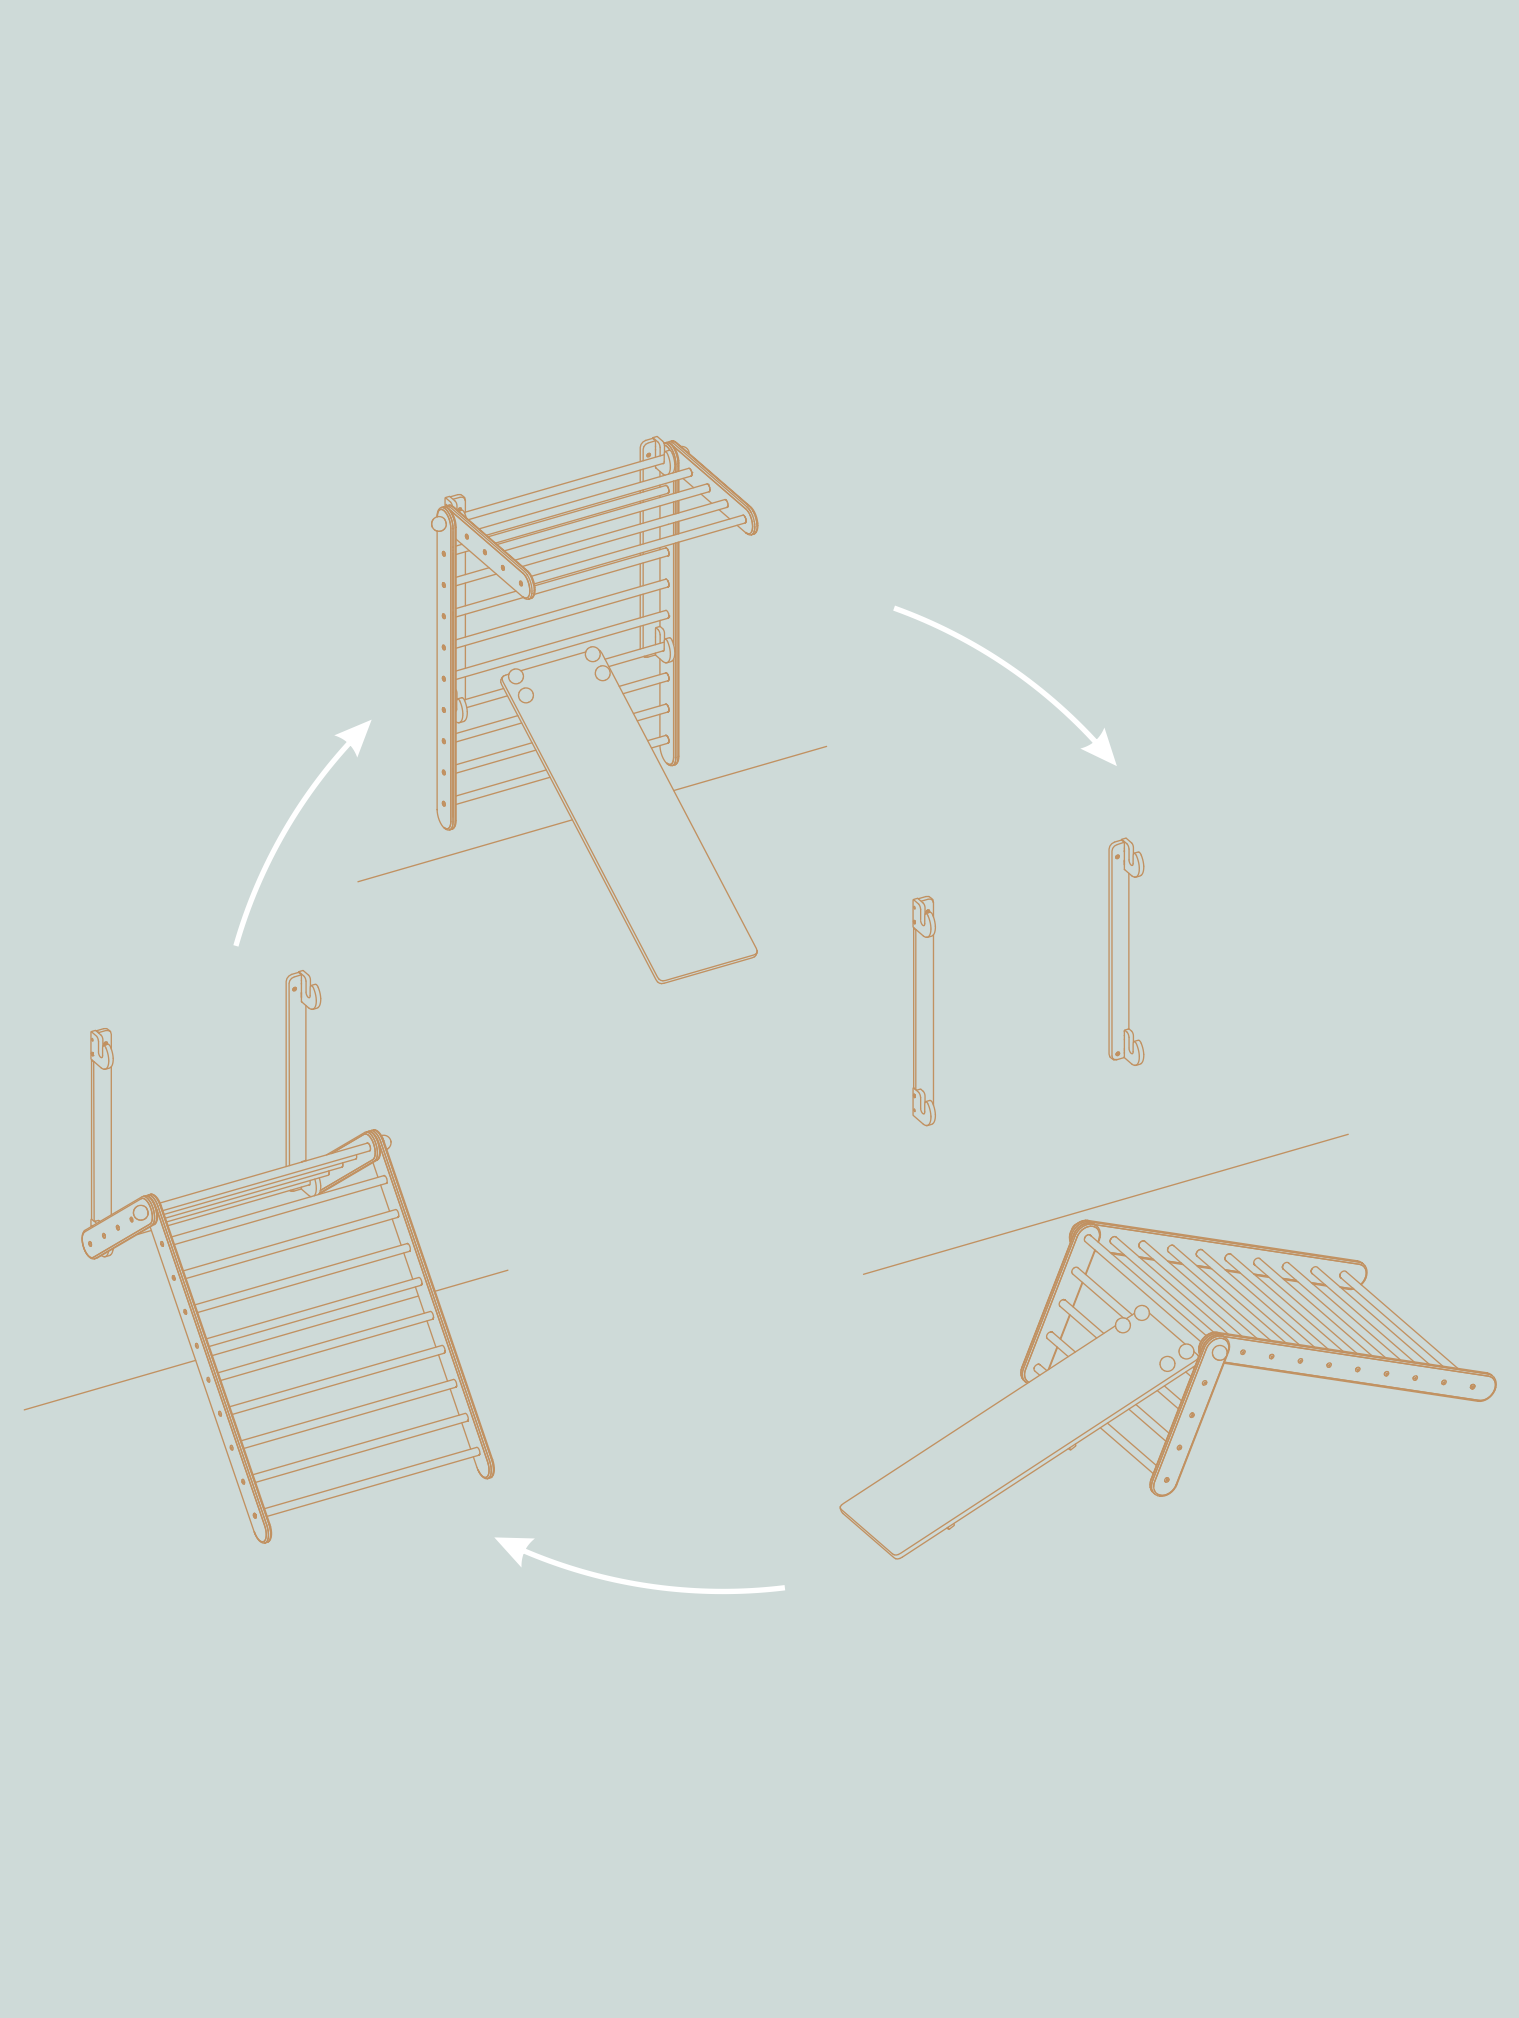

This piece functions as both a wall climber and a climbing triangle, offering endless creative play with its clever wall-mounting system. Kids can climb like on gym bars or adjust the triangle for different angles. They can also use it on the floor as a classic play structure.

Its asymmetrical legs let it rest on a sofa or bed, creating new play setups shaped by imagination. With a clean, minimalist design, it fits effortlessly into any room. Whether mounted or placed on the floor, it builds strength, balance, and independence, and it's easy to move and store.

CLIMBING TRIANGLES

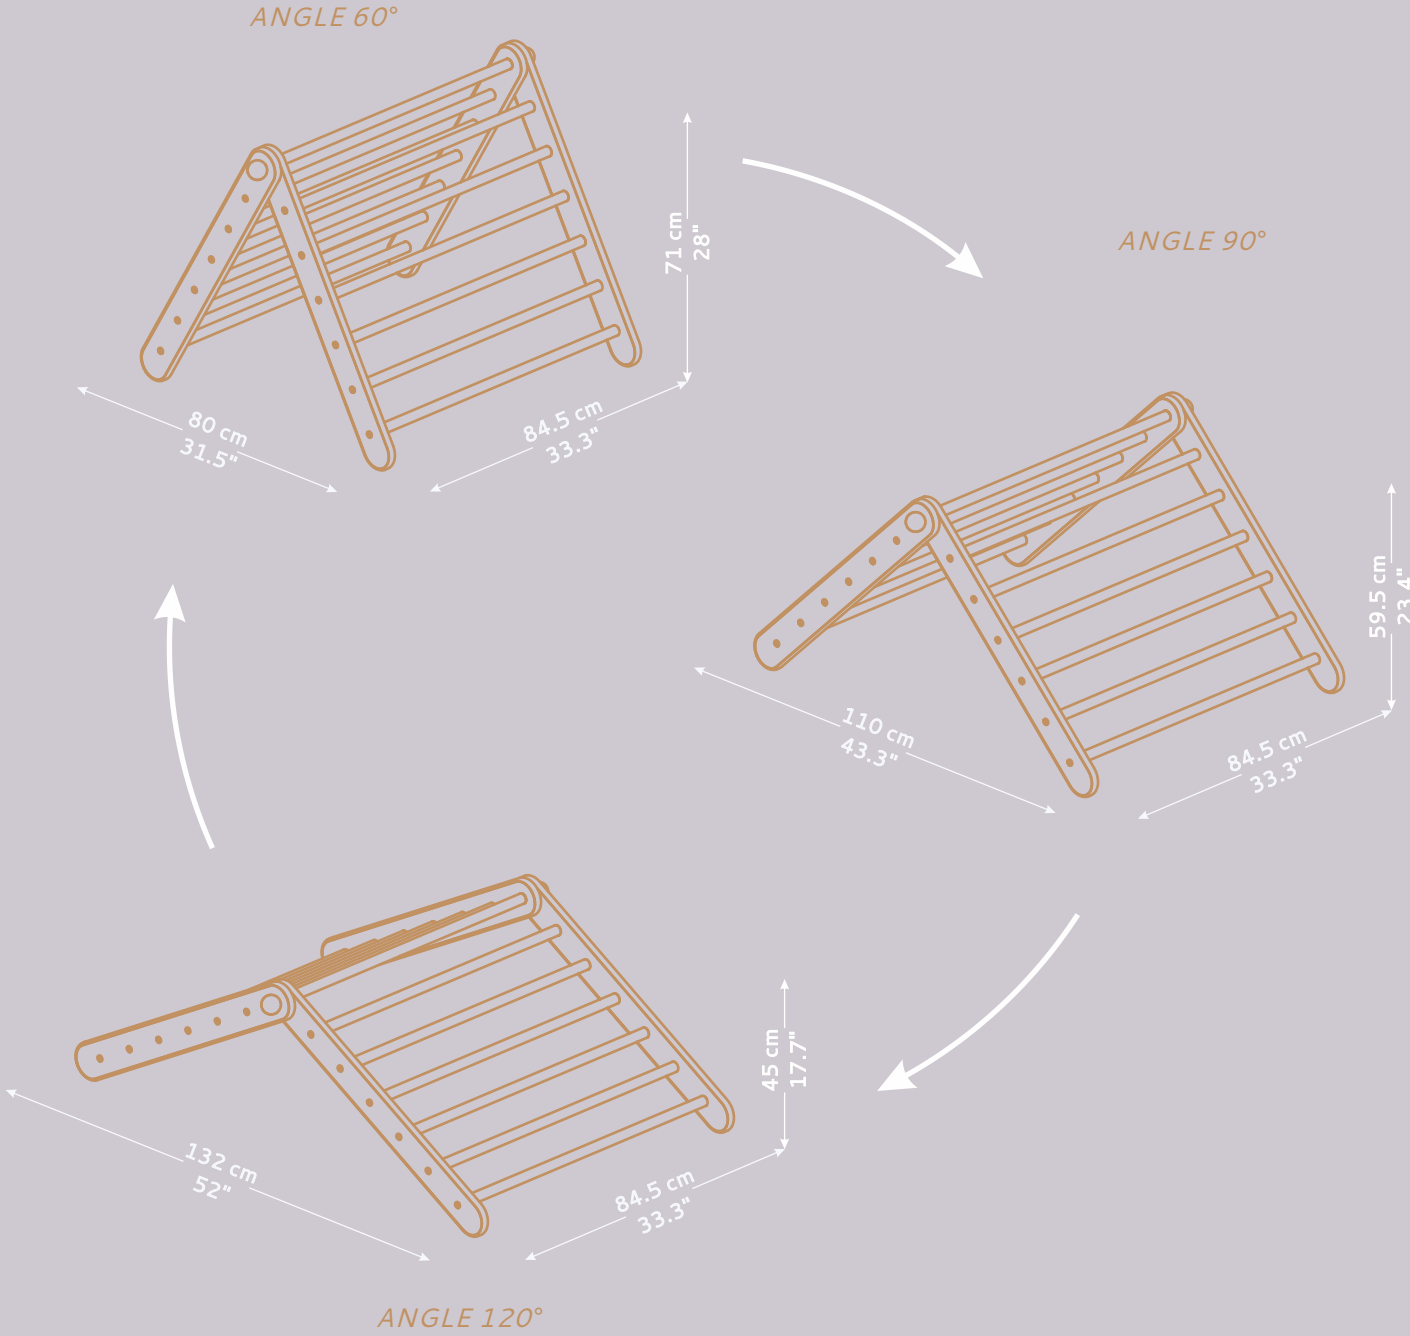

CLIMBING TRIANGLE

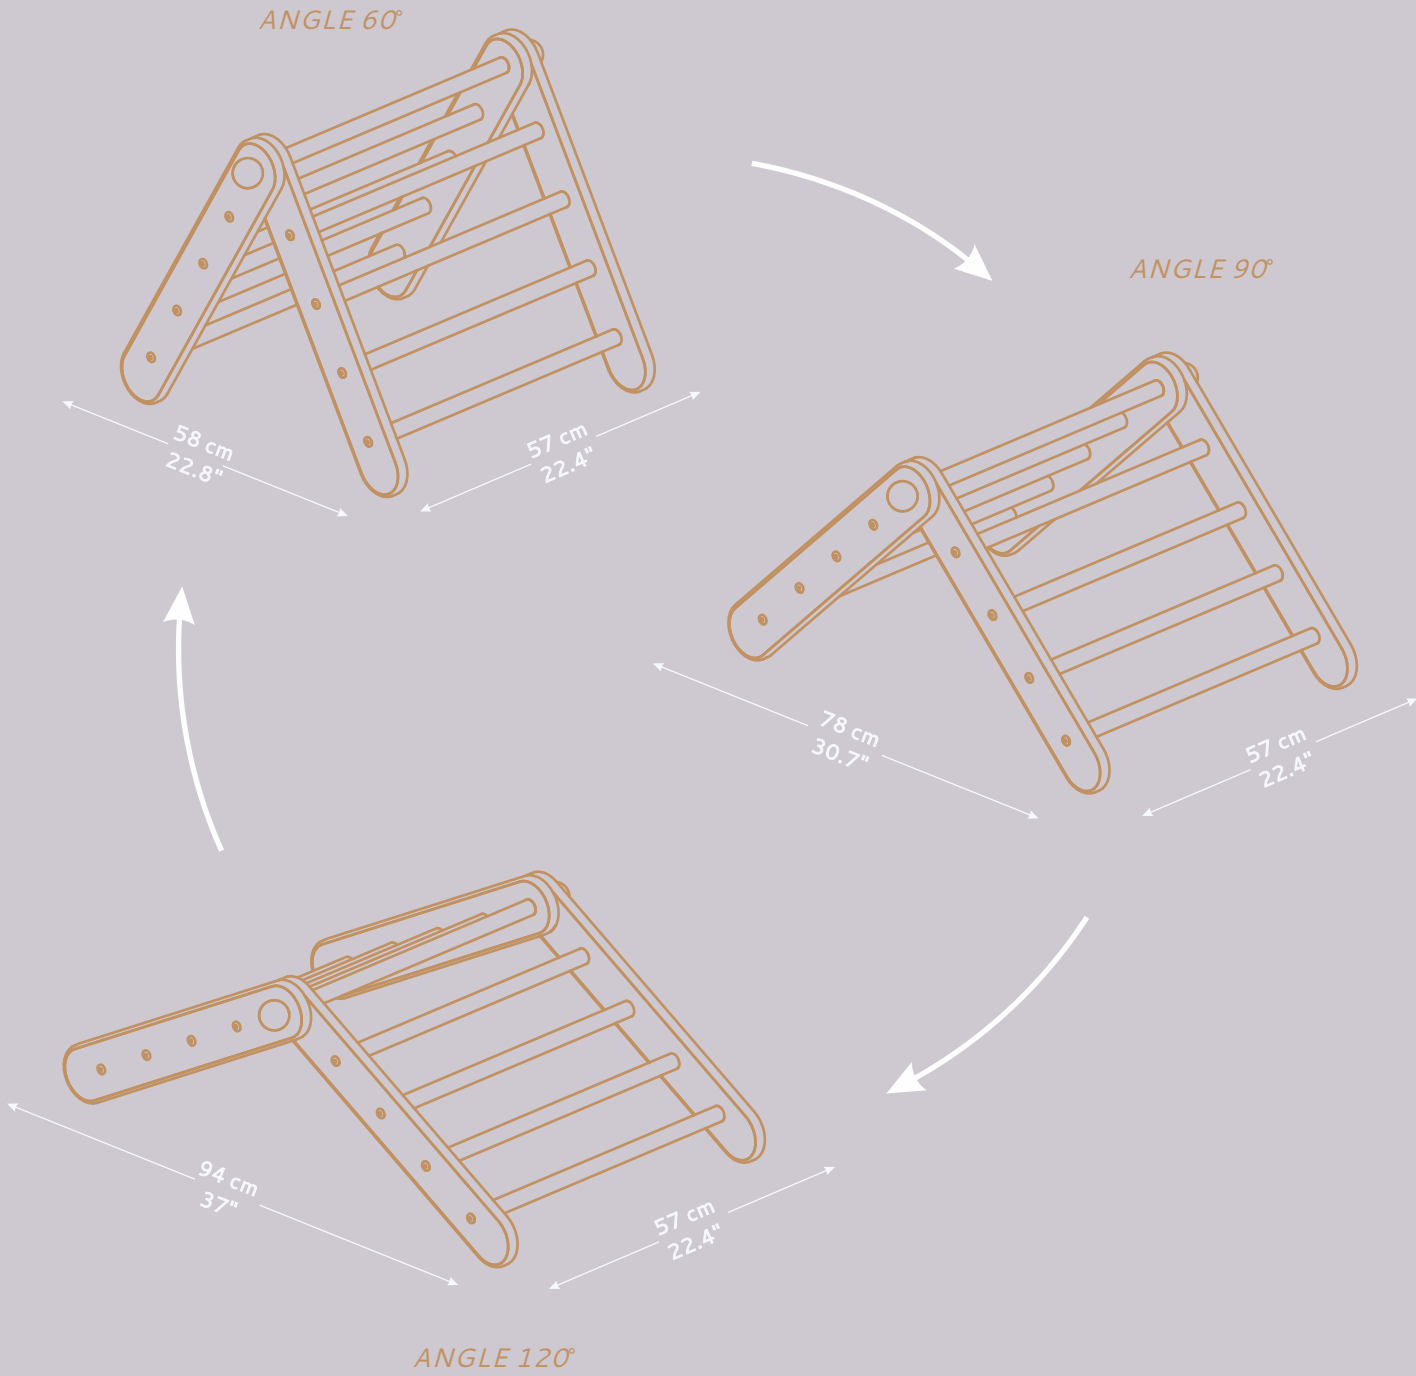

Climbing triangle comes in two sizes, designed to foster independence and physical development. Made from solid beechwood, it offers both durability and minimalist aesthetic.

The adjustable angles allow for different levels of difficulty, growing with your child. Its foldable design makes it easy to store, saving space when not in use. Perfect for encouraging active play, balance, and confidence, this versatile piece adapts to any room while promoting fun and healthy movement.

CLIMBING TRIANGLE

BABY CLIMBING TRIANGLE

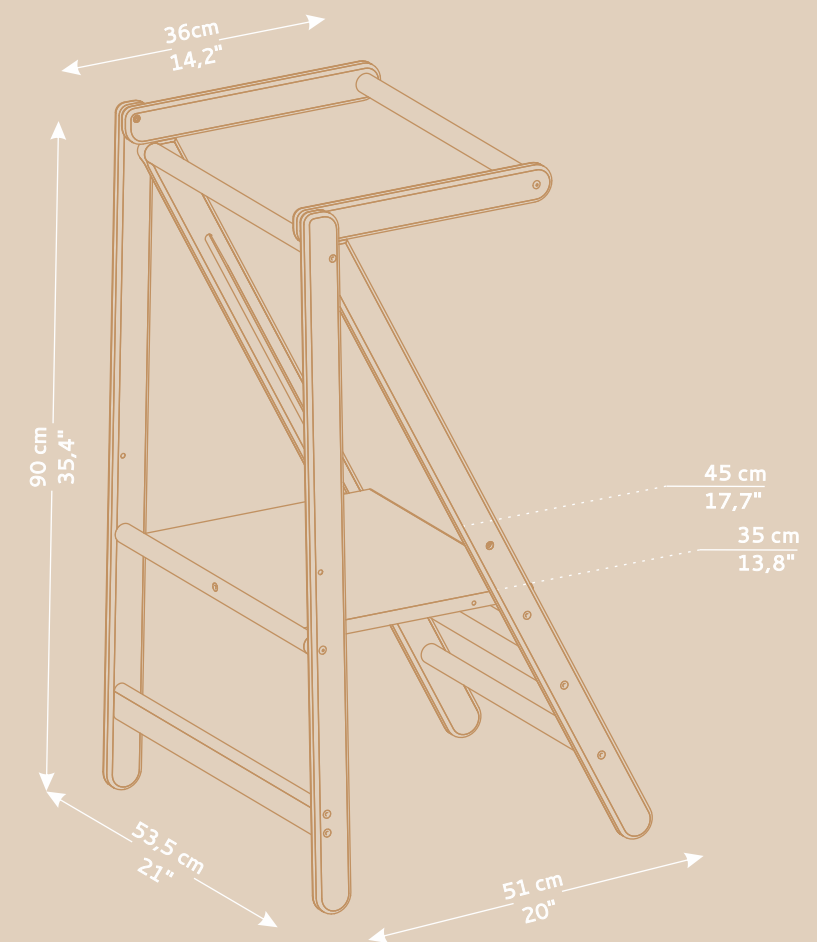

MONTETOWER

The foldable MonteTower encourages children's independence by providing a safe and accessible way for them to participate in everyday activities. Its compact, foldable construction makes it easy to store and blends seamlessly into any interior.

Perfect for reaching the table or counter, it allows children to safely take part in everyday tasks. This versatile tower encourages independence and turns daily routines into valuable learning experiences.

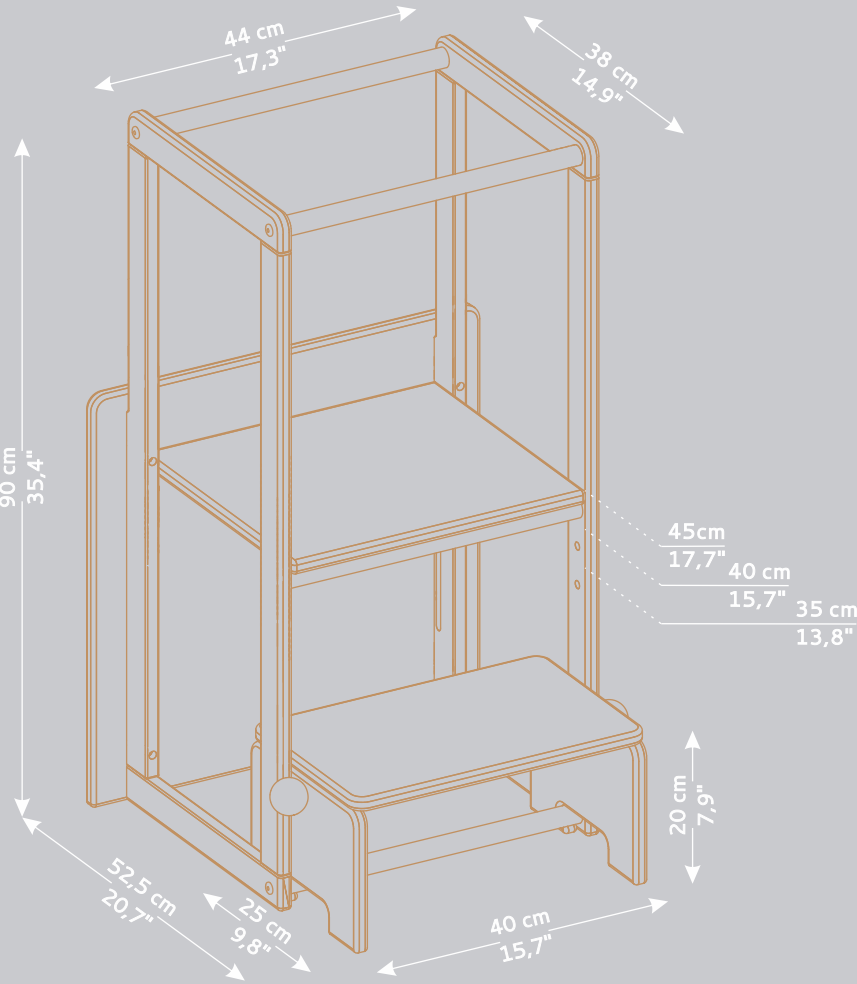

MONTEHELPER

The MonteHelper 2in1 is a versatile, space-saving solution designed to grow with your child. It easily transforms from a sturdy learning tower into a child-sized table, adapting seamlessly to your little one's changing needs.

Perfect for encouraging independence during kitchen activities or playtime, it allows children to safely engage with their surroundings. This dual-purpose design not only saves space but also provides years of use, making it an ideal choice for modern families.

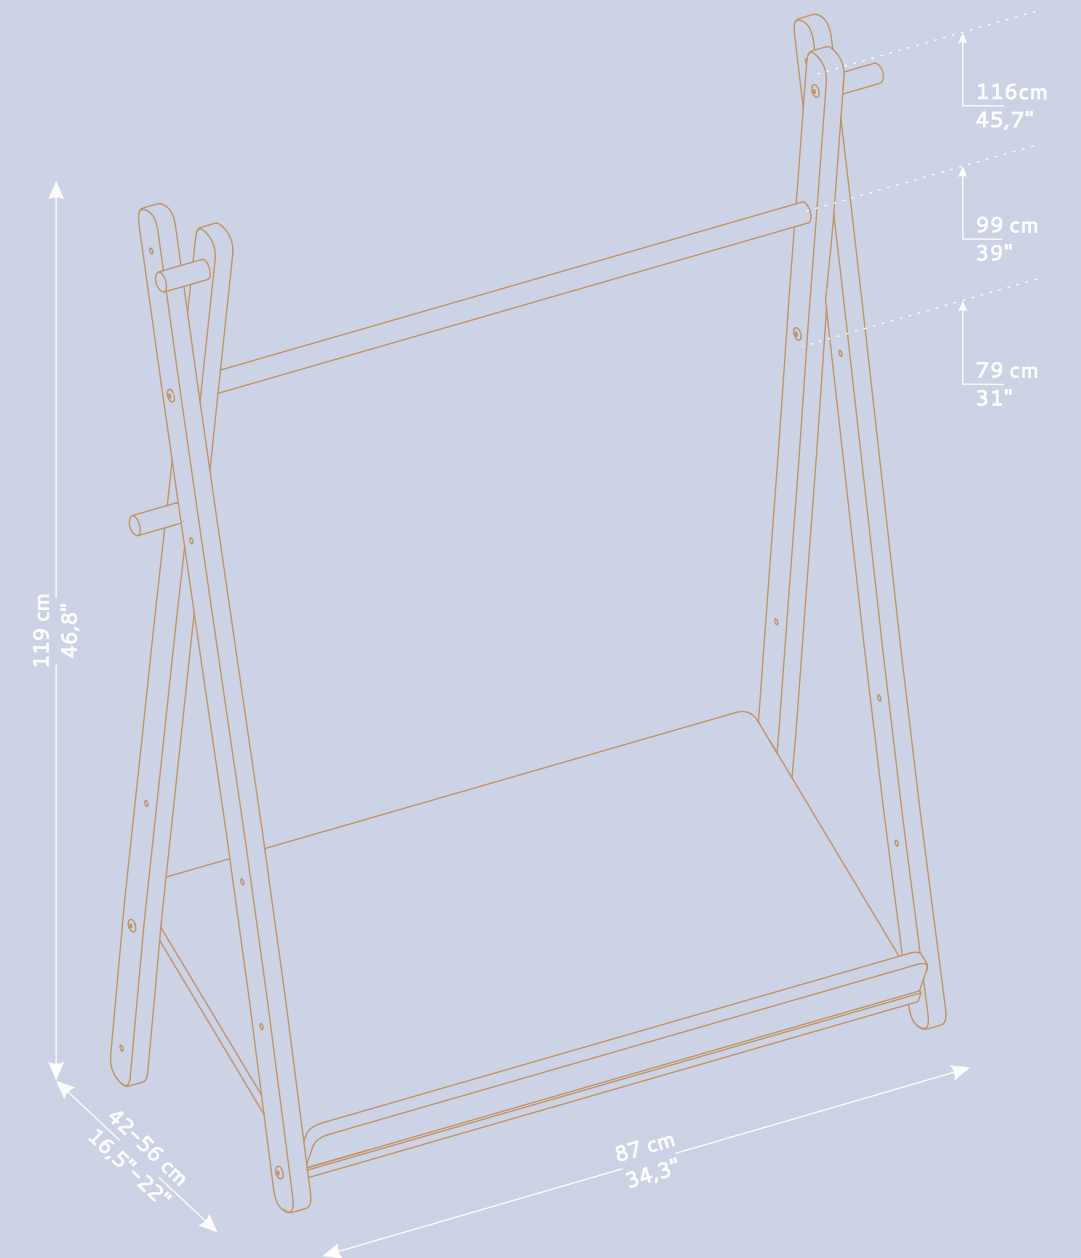

X RACK

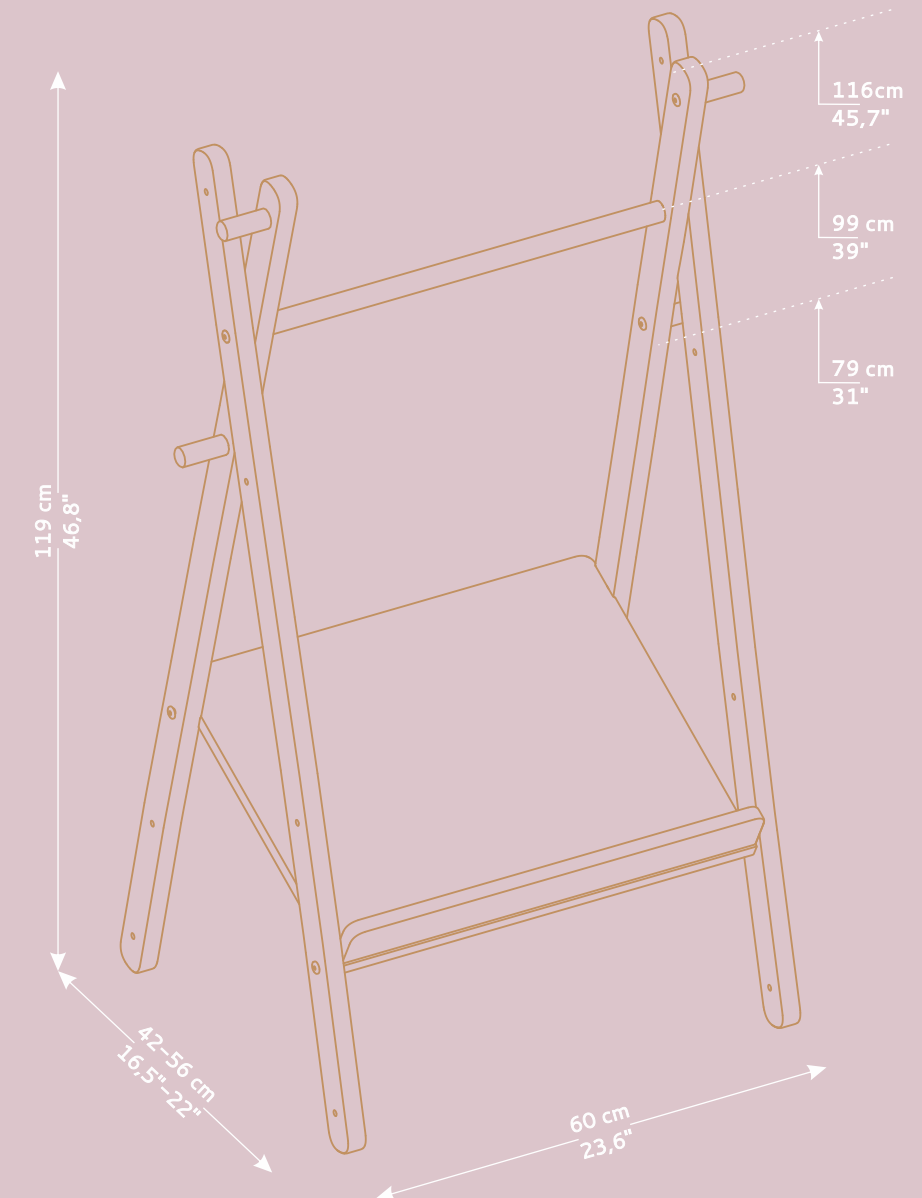

The Montessori X Rack is carefully designed furniture that encourages independence and organization from an early age. It features a three-position adjustable hanging bar, making clothes accessible for children from age one onward.

The rack also includes a lower shelf with four adjustable positions, ideal for storing shoes or toys, and four side hooks for hanging jackets or sweatshirts. This versatile piece evolves with your child, adapting to both their needs and your home.
